

April 25, 1994

Mr. Clifford Ringle
University of Utah
222 University Services Bldg.
Salt Lake City, Utah 84112

Dear Mr. Ringle:

Thank you for your submittal of water quality and water use information for your two wells. The University of Utah is always timely in the submittal of data and we greatly appreciate it. I just wanted to make you aware that some of the critical parameters we are requesting in a water quality analysis were missing from the data you sent us. Of particular interest in your area is chloride, which we believe may be increasing. For your information, I have enclosed a copy of a letter to water users dated May 1992 which lists the water quality parameters we are requesting. We realize that a complete inorganic analysis can be rather expensive, which is why we chose a very limited set of parameters that are indicative of potential quality problems.

When you take your next sample (during your peak pumping period of 1994), we would appreciate if you would sample for the constituents listed in the enclosed letter. If you have any questions, please do not hesitate to call me (538-7455). Once again, thank you for your cooperation.

Sincerely,

Michele Lemieux
Engineer
